INTRODUCING New Office Scent

Hang it from the back of your chair, or discreetly tape it to the inside of a desk drawer. Our Newscaster is made from the crushed remains of new paint, fresh carpet, unused toner cartridges, and others whose wheels always turn. Through a tube of nature, this scent is vaguely reminiscent of pine.

INTRODUCING

New Office Scent

Hang it from the back of your chair, or discreetly tape it to the inside of a desk drawer. Our freshener is made from the crushed remains of new paint, fresh carpet, unused toner cartridges, and chairs whose wheels all work. Through a fluke of nature, this scent is vaguely reminiscent of pine.
